

## Shelby Financials Export

---

*Tested/Supported in Rock version: 8.0-14.0*

*Created: 10/29/2018*

*Updated: 5/11/2023*

*Rock Shop Plugin: <https://www.rockrms.com/Plugin/97>*

### Summary

Quick Links:

- [What's New](#)
- [Configuration](#)
- [Exporting to Shelby Financials](#)

### What's New

- The following new goodness will be added to your Rock install with this plugin:
  - **New Block:** Shelby Financials Batch to Journal (added to the Batch Detail page on install)
  - **New Block:** Shelby Financials Batches to Journal (added to the Shelby GL Batch Export page on install)
  - **New Account Attributes:** There are a number of new Account attributes that control where transactions are posted in Shelby Financials
  - **New Transaction Attribute:** Transaction Project
  - **New Page:** Projects (Finance > Administration > Projects)
  - **New Page:** Shelby GL Export (Finance > Functions > Shelby GL Export)
  - **New Defined Type:** Financial Projects stores the Defined Values that designate what Project a transaction or batch should be associated with
  - **New Batch Attribute:** Date Exported

# Configuration

## Batch to Journal Block

After install, the Shelby Financials Batch to Journal block was added to your Batch Details page.

1	<b>Detail Page</b> Link to the Financial Batch Details page
2	<b>Button Text</b> Customize the text for the export button
3	<b>Months Back</b> Number of months back that batches should be loaded. This is helpful to prevent database timeouts if there are years of historical batches
4	<b>GL Account Grouping</b> Determines if debit and/or credit lines should be grouped and summed by GL account in the export file
5	<b>Journal Description Lava</b> Lava for the journal description column per line. Default: Batch.Id: Batch.Name
5	<b>Enable Debug</b> Outputs the object graph to help create your Lava syntax

Account Attributes

The export will always create (at a minimum) two lines for a Journal - a debit and a credit line. The Credit and Debit Account attributes are how this is defined. Each of these attributes will need to be set to the Id of the option in your Shelby Financials GL. Only the Attributes that are filled in will be exported.

## Financial Gateway Attributes

If your financial gateway reports transaction fees to Rock in their transaction download, you may want to configure these Financial Gateway attributes to choose how those fees are handled in your export file.

- 1

**Gateway Fee Processing** How should the Intacct Export plugin process transaction fees?  
DEFAULT: No special handling of transaction fees will be performed. NET DEBIT: Add credit entries for any transaction fees and use net amount (amount - transaction fees) for debit account entries. GROSS DEBIT: Debit account entries are left untouched (gross) and new debit and credit entries will be added for any transaction fees. NOTE: Both Net Debit and Gross Debit require a Fee Account attribute be set on either the financial gateway or financial account.
- 2

**Default Fee Account** The default account number for transaction fees.

## Projects Defined Type

You may want to define the values for the Financial Projects defined type so the export knows what GL Project to associate accounts or transactions to in Shelby Financials. We have added a new Projects page under Finance > Administration. This page allows you to manage Projects defined values without needing the RSR-Rock Admin security role.

On the Projects page, add a value for each of your organization's Projects. The Value must be the Id from Shelby Financials. Description will be a friendly name for the Project.

# Exporting to Shelby Financials

## Assigning Projects

You can assign Projects to a financial account, a transaction or to a specific amount in the transaction.

**To assign a Project to an account**, you will set an [account attribute](#).

**To assign a Project to an entire transaction**, select the Transaction Project from the dropdown list when you create the transaction. To assign a project to an existing transaction, edit the transaction and choose a Project from the dropdown list.

**To assign a Project to part of a transaction**, as you add the accounts and amounts to the transaction, select the Project from the dropdown list. You can also a project by editing the accounts on an existing transaction.
